Why do we need energy storage systems?

This shift to renewable sources also makes delivering power reliably, where and when it's needed, a bigger challenge than ever before. Energy storage systems provide a wide array of technological approaches to manage our supply-demand situation and to create a more resilient energy infrastructure and bring cost savings to utilities and consumers.

Does a solar roof have a battery backup?

The AC-coupled battery backup is included when you purchase solar tiles (which sit on the roof) or solar roof tiles (solar tiles that replace your existing roof). The solar roof is made of glass solar tiles, which produce energy, and steel roofing tiles, which provide longevity and corrosion resistance to your roof.
