What are solar photovoltaic modules?

Solar photovoltaic modules are where the electricity gets generated, but are only one of the many parts in a complete photovoltaic (PV) system. In order for the generated electricity to be useful in a home or business, a number of other technologies must be in place.

Is battery storage a good way to store solar energy?

Thankfully, battery storage can now offer homeowners a cost-effective and efficient way to store solar energy. Lithium-ion batteries are the go-to for home solar energy storage. They're relatively cheap (and getting cheaper), low profile, and suited for a range of needs.

Where are energy storage systems located?

es and lead acid batteries.BEHIND-THE-METER: Behind-the-meter, also known as customer-sited, energy storage systems are located on the owner's property, literally behind the utility meter on the customer side, as opposed to front-of-the-meter systems, which are located on the utility side of the meter and directly connected to the
