

Do I need a travel power adapter in Vietnam?

In order to avoid potential damage to your home electrical appliances and devices, it is best practice to purchase a travel power adapter prior to arriving in Vietnam. Typically Vietnam plugs are round pins with either two or three pins and operate at 220 volts depending on the region. The most common types you will find are:

Can I use a power socket in Vietnam?

All power sockets in Vietnam provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Vietnam if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

How do I choose a power adapter for Vietnam?

Make sure your adapter has voltage compatibility-- look for "100V" or "110V" written on it. Vietnam runs on 220 Volts and 60 Hz frequency of electricity. Consider buying a surge protector/power strip with a switch -- this will allow multiple devices to be plugged in at once and give you extra protection against power surges and spikes.

Our first display of The Moving Wall was in Tyler, Texas in 1984. Over the years we have witnessed so many people from all walks of life visiting our replica of the Vietnam Wall. Probably the most rewarding part of displaying our wall throughout this great land of ours is the thanks and gratitude we receive when people come to our display.
