

# Honduras pumped energy storage project bidding

Are pumped storage plants a good investment?

New pumped storage plants take longer than that to license and build, cost billions, and can last a century--a virtue, but also a commitment that takes nerve in a rapidly changing market. It's possible utilities will be spared that choice by long-duration storage technologies that are still being developed.

Does pumped storage have an environmental impact statement?

As a self-financing,vertically integrated utility responsible for delivering power to 10 million people in the Tennessee Valley,it can capture the benefits of pumped storage regardless of whether the market knows how to price them. But it does have to complete an environmental impact statement.

Do you need a FERC permit for pumped storage?

As a federal agency,it doesn't need a FERC permit. As a self-financing,vertically integrated utility responsible for delivering power to 10 million people in the Tennessee Valley,it can capture the benefits of pumped storage regardless of whether the market knows how to price them.
