

What is Bess at HKIA?

Details of BESS at HKIA Overview of design The BESS at HKIA comprises three 40-foot BESS containers, which in total provide an additional 4 MVA emergency power capacity for at least 30 minutes. All three BESS containers are installed on trailers outside the existing generator house.

What does Bess stand for?

The First Commercial-use Battery Energy Storage System (BESS) Functioning in Parallel with Other Renewable Energy Installations to Form a Micro-grid in Hong Kong Helping Achieve Net Zero Carbon Emissions The Leading BESS Solution Provider in Hong Kong

What is a Bess system?

The BESS stands in for the RE system at CIC- ZCP during its downtime and peak periods, while also minimising the risk of system instability during maintenance.

What is Bess - a high voltage battery energy storage system?

BESS is the first high voltage battery energy storage system in Hong Kong. Throughout the project stages from feasibility study and design to installation, testing and commissioning, the team has made concerted effort to liaise and coordinate with different parties such as power utilities, battery suppliers, experts and contractors.

How does Bess work?

Contrary to the above, BESS-based essential power source operates by storing electrical energy from the grid and releasing it back to the airport's own 11 kV power grid. Similar to electric vehicles, carbon emission of BESS depends on the generation mix of the grid.

What is the largest Bess in Hong Kong?

It is the largest BESS in Hong Kong, with a maximum power output of 4 megawatts. It is the size of around three 40-foot containers, weighs 75 tonnes, and is on wheels so it can be flexibly used at different locations in the airport.

Dr. Xu Zhiyong, Chairman of A i-BESS Technology, who is currently attending the 2024 China (Vietnam) Trade Expo, took the trouble to travel from Ho Chi Minh City, Vietnam to Macau to ...

Hong Kong's carbon neutrality target in 2050 According to the World Green Building Council, 39% energy-related global carbon dioxide emissions is contributed by the property and construction ...
