

Can nature-based solutions improve the climate resilience of Honiara's urban residents?

This report examines the potential role of Nature-based Solutions (NbS) in contributing to a portfolio of actions aimed at enhancing the climate resilience of Honiara's urban residents; as well as proposing specific NbS actions that are appropriate for local context.

Who consulted on capacity development in Honiara?

This included consultations with key ministry personnel, Honiara City Council, MECCDM, SPREP, and Solomon Islands National University (SINU), to inform WP scoping and assess city-wide capacity development needs.

Can NBS improve climate resilience in Honiara?

Honiara would therefore benefit from NbS that draw on traditional cultural management practices of the environment and strengthen connections with "a Pacific Way" (Harms et al., 2018), with potential to enhance community-level climate resilience.

Are EBA approaches appropriate in Honiara?

EBA approaches are particularly appropriate in Honiara, "which has a high poverty rate, with high reliance on the natural environment such as forests, rivers, wetlands, and coastal marine ecosystems for household supply of essential needs" (SPREP 2018, p. 2).

Energy Policy Framework was revised in 2013<sup>1</sup> and a draft is currently before Cabinet for review. The draft ...  
Generation capacity outside Honiara is 6.9 MW. The total energy generated in ...

The TRHDP is part of a broader initiative called Solomon Islands Sustainable Energy Project, SISEP, and has as its objective the provision of electricity for Honiara from indigenous renewable energy sources (hydro) to provide more ...

First established in 2020 and founded on EPRI's mission of advancing safe, reliable, affordable, and clean energy for society, the Energy Storage Roadmap envisioned a desired future for energy storage applications ...
