

The inside of the steel casing above the water line looks pretty good, no flakes coming off or anything. Some one from a well company came out and told me the well casing ...

Learn about effective cleaning methods, essential tools, and vital safety tips to enhance durability and performance. Dive into eco-friendly solutions, best practices, and the importance of ...

That is the way we do oil wells except we drill "through" the water zone. As a kid I leared how to use a torch slotting steel casing for water wells. I have seen a lot of old wells ...
