What is a home energy storage system?

Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights. Whole-home setups allow you to maintain normal energy consumption levels--but at a cost.

Why should you choose a home energy storage system?

With independence from the utility grid, you can avoid the inconvenience of outages without sacrificing your daily routines. Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights.

Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

How do I choose a home battery backup system?

Deciding which battery backup system you will install is the most crucial step in the purchasing process. While considering the substantial investment costs of a home battery system, the ideal solution for your property should align with your unique energy goals and budget.

What is a flex energy storage system?

The Flex Energy Storage System is marketed as a "solar generator" alternative to traditional standby generators. It's explicitly designed for backup power and doesn't feed excess solar power back to the grid. The system comes in 5-10 kWh capacities and includes solar panels in the installation package.

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
