

# How to disassemble the hydraulic accumulator

Who should install a hydraulic accumulator?

Since hydraulic accumulators are pressure vessels, the installation, commissioning, disassembly, and maintenance should be performed by professionally trained and qualified personnel.

Can You disassemble an accumulator while under pressure?

Never attempt to disassemble the accumulator while it is under pressure. Always assume the accumulator is under pressure until it is confirmed that it isn't. Never add unnecessary weight or load on top of the accumulator, never use the accumulator as a structural support and never step on them.

How do you clean a hydraulic accumulator?

Used to remove hydraulic port assembly from the accumulator. Rounded edges. Used to tuck in hydraulic port O-ring. Cleaning: All metal parts should be cleaned with a cleaning agent. Seals and soft parts should be wiped clean. Bladder (Item 2): Inflate bladder to normal size. Wash bladder with a soap solution.

What gas should a hydraulic accumulator use?

Since hydraulic accumulators are pressure vessels, the installation, commissioning, disassembly, and maintenance should be performed by professionally trained and qualified personnel. Only use an inert gas like nitrogen for a pre-charging. Nitrogen that is 99.99 percent by volume is strongly recommended.

How to install accumulator?

Install accumulator on machine. Figure 1: Once the accumulator has been removed from the equipment, the accumulator body should be secured in a vise, preferably a chain vise. If a standard jaw vise is used, brass inserts should be used to protect the accumulator hydraulic port assembly (Item 7) from damage.

How do you remove accumulator ring?

shell opening to center the fluid port body. Push the fluid port assembly (9-14) into the accumulator shell. Remove the back-up washer (16), o-ring (17) and back-up ring (18). Remove the anti-extrusion ring (15) by folding it in half and sliding it through the shell opening.

To arrange for hydraulic accumulator repair, testing or recertification, call us on 02476 470077 or email [sales@hydraulic-centre](mailto:sales@hydraulic-centre) Stock Search If you are looking for a specific part or stock code, try our extensive stock search.
