

What happens when airbags deploy in a collision?

When airbags deploy in a collision, multiple components of the vehicle's safety system might need inspection, repair, or replacement to restore the vehicle to a safe operational state. You will need to first replace all airbags and seat belts, and install the airbag control module computer last after all repairs are done.

Do I need to replace the airbag computer?

You must replace the airbag computer, once it stores a deployment command it cannot be cleared. Its done, finished, Kaput. Of course you can replace just the Airbag modules themselves for appearance reasons. They just won't work again until you correctly replace the SDM (computer).

When do I need to replace the airbag control module?

You will need to first replace all airbags and seat belts, and install the airbag control module computer last after all repairs are done. This is necessary because the module will store soft codes again, indicating that there is a problem in the SRS Supplemental Restraint System, such as bad airbag or bad seat belt.

How do you store a live airbag module?

Always store a live module in its approved shipping container when available. Store live modules in a cool, dry, secure area away from all corrosives, oxidizers, ignition sources, or high heat sources. Curtain type airbags should be stored lying as flat as possible and unfolded. Always store airbag modules with the cover facing up not down.

Do I need an airbag computer module?

You don't need a computer module, you just need replacement air bags. You must replace the airbag computer, once it stores a deployment command it cannot be cleared. Its done, finished, Kaput. Of course you can replace just the Airbag modules themselves for appearance reasons.

Can I Reset my car's airbag module myself?

Since it's also an emergency response to a strong collision, it's a single-use trigger that needs replacing. Even after recognizing its different components, it will be nearly impossible to reset your vehicle's airbag module yourself.

With insurance, it's hard to tell if they simply replace every single part that has "airbag" in the word just for liability reasons. Seems they always just replace parts if there's even a question. For example, I have a ...
