

How do you use a hydraulic accumulator?

o take proper safety precautions noted on the instructions. If an accumulator is already installed on a system, pump a small amount of system fluid (10% of accumulator capacity) into the accumulator, at low pressure. (Do not exceed 35 psi). Turn off all power to the system and fully release all hydraulic pressure from the accumulator.

Who should install a hydraulic accumulator?

Since hydraulic accumulators are pressure vessels, the installation, commissioning, disassembly, and maintenance should be performed by professionally trained and qualified personnel.

How do I install accumulator?

Position accumulator so that fluid (same fluid as used in system) can be poured into the accumulator (add approximately 10% of the accumulator capacity). This fluid will act as a cushion when the accumulator is pre-charged with gas. Pre-charge accumulator to desired pressure. See pre-charge instructions. Install accumulator on machine.
