

This patent insight report on innovation trends in electrolyzers for hydrogen production, jointly prepared by the European Patent Office (EPO) and the International Renewable Energy Agency (IRENA), uses patent statistics to ...

Introduction. Hydrogen is considered a promising energy carrier for the future, due to its abundance, high energy content (142 MJ/kg) and its ability to be employed both in ...

Hydrogen is considered a promising energy carrier for the future, due to its abundance, high energy content (142 MJ/kg) and its ability to be employed both in fuel cells ...

609 hydrogen production patents are confirmed to be associated with HFTO funding (380 U.S. patents, 117 EPO patents, and 112 WIPO patents). 224 hydrogen storage patents are ...

This study by the EPO and IEA is the most comprehensive, global and up-to-date investigation of hydrogen-related patenting so far. It covers technologies for the full range of hydrogen supply, ...

New materials such as Perovskite hydride structures for hydrogen storage are currently in the developmental stage. 4.3. Patents related to hydrogen storage US Patent, US20220017364A1 ...

Latest EPO-IEA report is the most comprehensive and up-to-date study of global trends in hydrogen technologies for 2011-2020 Hydrogen production technology patents have massively shifted towards alternative, low ...

582 fuel cell patents (52%) 397 hydrogen production and delivery patents (36%) 134 hydrogen storage patents (12%) 28% of all patents are available for license or licensed 43% are actively ...

Innovation trends in electrolyzers for hydrogen production shows that patent filings for hydrogen production technologies have grown on average by 18% each year since 2005. Renewables-based hydrogen can be ...
