

Dihydrogen (H<sub>2</sub>), commonly named "hydrogen", is increasingly recognised as a clean and reliable energy vector for decarbonisation and defossilisation by various sectors. The global hydrogen ...

Hydrogen shipping could be expedited by converting hydrogen to synfuels (such as ammonia or methanol) at export hubs. Liquid hydrogen shipment could be one way to enable the global hydrogen trade after 2030, ...

The CHBC Hydrogen Energy Storage and Renewable Hydrogen Sector Action Group seeks to educate stakeholders, mainly policymakers, by providing information and resources on hydrogen production, delivery, and energy ...

3 ???&#0183; The article discusses 10 Hydrogen energy storage companies and startups bringing innovations and technologies for better energy distribution. November 18, ... government rules ...

Hydrogen use as an energy carrier remains limited and is principally limited to road vehicles. By June 2021 more than 40 000 fuel cell electric vehicles were in circulation around the world, with almost 90% of those in four countries: ...

The goal is to provide adequate hydrogen storage to meet the U.S. Department of Energy (DOE) hydrogen storage targets for onboard light-duty vehicle, material-handling equipment, and portable power applications. By 2020, HFTO aims to ...

renewable energy (VRE), the need for effective energy storage and international carriers of low-carbon energy has intensified. This study delves into hydrogen's prospective, multifaceted ...

The Hydrogen Shot Summit August 31 & September 1, 2021 o Goal: Identify pathways to meet Hydrogen Shot target of \$1 per 1 kilogram in 1 decade. o Target audience: stakeholders from ...

The Database covers all projects commissioned worldwide since 2000 to produce hydrogen for energy or climate change-mitigation purposes and all projects under development worldwide of hydrogen pipelines, ...
