

Will Hydrostor provide back-up power to Broken Hill in 2027?

BROKEN HILL,AUSTRALIA - December 08,2023 - Hydrostor,a global long duration energy storage (LDES) developer and operator,has reached an Agreement with Transgrid,which will see the 200MW/1600MWh Silver City Energy Storage Project (Silver City) provide back-up power to Broken Hill as early as 2027.

Will Hydrostor be better than diesel generators in Broken Hill?

(Supplied: Hydrostor) The Transgrid report highlighted that Hydrostor's project was expected to deliver \$286 million in net benefits over a 27-year assessment period,just under 6 per cent more than the diesel generators. Ms Jordan said it would have broader impactsin Broken Hill than the generators.

Who are Perilya Broken Hill limited & Hydrostor?

Perilya Broken Hill Limited and Hydrostor have been working together since 2020 to evaluate the potential of a large-scale long duration energy storage project adjacent to the Potosi Mine northeast of Broken Hill, NSW, which will continue to operate as normal.

What's going on with Hydrostor's Silver City project?

Martin Becker, Hydrostor's Vice President of Business Development and Origination in Australia said, "Having reached this critical milestone, we are looking forward to progressing the permitting for our Silver City project and building on local partnerships in Broken Hill.

Will Hydrostor provide backup power to Silver City?

This week,the company signed a formal agreement with Transgrid to provide backup power for the Silver City through the facility as early as 2027. This comes after Hydrostor signed a binding agreement with mining exploration company Perilya to use its Potosi mine,which will reach the end of its life next year,for the project site.

What is Hydrostor doing with Perilya's Potosi mine?

Canadian company Hydrostor has signed a binding agreement with base metals and exploration company Perilya for access to Perilya's Potosi mine,on the outskirts of the city. The facility will store compressed air undergroundand is expected to generate 200 megawatts of power that would be used as a back-up supply for Broken Hill.

Hydrostor has reached an agreement with New South Wales (NSW) transmission network operator Transgrid that will see the proposed 200 MW/1,600 MWh Silver City Energy Storage Project support the reliability of electricity supply for Broken Hill by as early as 2027. Hydrostor is planning to build a 200 MW energy storage system with eight hours of ...

Broken Hill has moved another step closer to becoming one of the world's largest renewable mini-grids, following the publication of Transgrid's Project Assessment Conclusions Report (PACR) into securing the area's back-up power supply.. Transgrid executive general manager of network Marie Jordan said the preferred long-term solution put forward by Canadian firm Hydrostor was ...

The historic mining town of Broken Hill in NSW is set to become home to an innovative energy storage solution. The Silver City Energy Storage Project will provide back-up power supply to the remote community of ...

Land deal signed for deep storage to create Broken Hill mini grid, but network rules still stand in the way NSW energy minister Penny Sharpe, Hydrostor's Martin Becker and Jon Norman, and Lands ...

BROKEN HILL, AUSTRALIA, Dec. 07, 2023 (GLOBE NEWSWIRE) -- Hydrostor, a global long duration energy storage (LDES) developer and operator, has reached an Agreement with Transgrid, which will see the 200MW/1600MWh Silver City Energy Storage Project (Silver City) provide back-up power to Broken Hill as early as 2027.A first of its kind energy storage ...

Broken Hill is located in the far west of New South Wales and is part of Transgrid's south western transmission network. It is currently supplied by a single 220 kV transmission line, "Line X2", from Buronga which spans approximately 260 km. ... followed by network support provided by the Hydrostor compressed air storage solution (Option 1A(4 ...

The project will support Broken Hill's energy grid by reliably incorporating the increasing amount of renewable energy, while providing a reliable backup power solution to the city when ...

On behalf of the Australian Government, the Australian Renewable Energy Agency (ARENA) has announced it has conditionally approved \$45 million in funding to construct a 200 MW / 1600 MWh fuel-free energy storage facility, developed by Hydrostor Inc, utilising their Advanced Compressed Air Energy Storage (A-CAES) technology and repurposing a disused ...

BROKEN HILL, AUSTRALIA, Dec. 18, 2023 (GLOBE NEWSWIRE) -- Hydrostor, a global long duration energy storage (LDES) developer and operator, has been awarded a Long-Term Energy Service Agreement ...

Silver City is a 200 MW Advanced Compressed Air Energy Storage (A-CAES) facility that is under late-stage development in Broken Hill, New South Wales. The project provides unmatched benefits to consumers in a remote region with ...

The flexible site selection allows Hydrostor's A-CAES technology to target specific problems and capture new value streams, including fringe-of-grid applications such as at Broken Hill, Renewable Energy Zones (REZs), and off-grid applications.

The Hydrostor team looks forward to welcoming members of the Broken Hill community to any of the consultation sessions detailed below. DATE TIME LOCATION Wednesday 24 July 2024 5:30pm - 7pm Musicians Club Thursday 25 July 2024 7:30am - 9:30am Giovanni and Co Thursday 25 July 2024 10:30am -12 midday Pepe"s

The project will support Broken Hill"s energy grid by incorporating the increased generation of reliable, renewable energy and provide a reliable backup power solution to the city when required.

MELBOURNE, AUSTRALIA, 8 NOVEMBER 2024 - Global long duration energy storage (LDES) developer and operator, Hydrostor, and the New South Wales (NSW) Government have officially signed a Crown Lands agreement to enable the construction of the Silver City Energy Storage Centre, designed to provide crucial backup power to Broken Hill and support the stability of ...

The project will support Broken Hill"s energy grid by reliably incorporating the increasing amount of renewable energy, while providing a reliable backup power solution to the city when required. The facility will be able to generate 200 megawatts of stored power, over 8 hours when discharging at full capacity, and much longer at a lower output.

BROKEN HILL, AUSTRALIA - January 20, 2023 - Hydrostor Inc (Hydrostor), a leading long duration energy storage (LDES) solution provider, announced that it acquired the remaining 50% interest in the Silver City Energy Storage Centre ...
