

How many seasons does Iceland have?

Iceland is reported to have four seasons, but keep in mind that these look a little different than they might in other parts of the world. If there were a month that could be associated with spring, though, April would be that month. The average temperatures finally stay above freezing while still not skyrocketing.

Does Iceland have a winter season?

Skiing is at its top form during this month since it is still snowy but mild in temperature. Iceland is reported to have four seasons, but keep in mind that these look a little different than they might in other parts of the world. If there were a month that could be associated with spring, though, April would be that month.

Does Iceland have a rainy season?

Iceland does not have a rainy season, but precipitation peaks in October to February, with the southern and western parts receiving the most rainfall. The North, East and Interior experience colder winter temperatures but warmer summers, and noticeably less snow and rain. Iceland's most influencing weather element is the wind.

Does Iceland experience autumn and spring?

Of course, Iceland experiences autumn and spring-like everywhere else on the planet; the major shift lies in the seasons' noticeability. The sheer polarity between summer and winter here means that what lies between often feels little more than a short bout of milder weather.

Is May a good month for spring in Iceland?

May is the real month of spring in Iceland. Temperatures remain over freezing and, on some good days, can climb up to 10°C (50°F). As the driest and the least windy month of the year, May brings a huge amount of relief to the locals after the long winter. Although the averages are very promising, the weather can still be unpredictable.

When is the driest month of the year in Iceland?

Although May is the driest month of the year, it's still quite cloudy. Statistically, August offers the most sunshine in the summer months. For the Northern Lights, March might be the best month as it's the least cloudy part of the aurora season, which lasts from September to April. What Are the Seasons in Iceland?
