

Does Dominica have hydropower?

In the past, hydropower supplied 90% of Dominica's electricity. However, as population and electricity demand grew, diesel generator use increased and hydropower share diminished. Dominica Electricity Services Limited (DOMLEC) is the sole electric utility with an installed electrical generating capacity of 23.8 megawatts (MW) and a peak demand of 17.2 MW.

Does Dominica generate solar power?

Dominica has a high solar potential with a solar resource of 5.6 kWh per square meter per day. The government has installed LED streetlights (in 2013 and 2014). Dominica also has approximately 30 MW of wind power potential, some of which is under development.

How much wind power is available in Dominica?

Dominica has a wind power potential of 10 MW at Crompton Point in Saint Andrew and an additional 20 MW elsewhere in the country. After reviewing nine wind studies, DOMLEC came to this conclusion.

The 752MW Punta Catalina is a coal-fired thermoelectric power plant with two power-generating units located in the Valdesia region of the Peravia province in the Southwest sector of the Dominican Republic. Punta Catalina is ...

Utilities of Dominica Power. Dominica Electricity Services (DOMLEC) is the only licensed provider of electricity in the country. DOMLEC is majority owned by the US firm WRB (51 per cent), while Dominica Social Security owns 20 per cent, and local corporate and private citizens own the remaining 29 per cent. The Electricity Supply Act 2006 ...
