

What is a Recommended Practice for characterization of energy storage technologies?

Purpose: This recommended practice describes a format for the characterization of emerging or alternative energy storage technologies in terms of performance, service life, and safety attributes. This format provides a framework for developers to describe their products.

How does IEEE address infrastructure evolution?

IEEE addresses infrastructure evolution in the energy sector as it accelerates towards grid modernization to help ensure safe, reliable, and available energy to global customers. IEEE provides a Standard for Interconnection and Interoperability of Distributed Energy Resources with Associated Electric Power Systems Interfaces.

Does industry need energy storage standards?

As cited in the DOE OE ES Program Plan, "Industry requires specifications of standards for characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry professionals indicate a significant need for standards ..." [1, p. 30].

What's new in energy storage technology?

This technical conference will highlight advances in electrical energy storage technologies including new battery chemistries as well as advances in power conversion systems that make grid scale as well as distributed renewable energy storage more efficient and effective.

Are energy storage codes & standards needed?

Discussions with industry professionals indicate a significant need for standards..." [1, p. 30]. Under this strategic driver, a portion of DOE-funded energy storage research and development (R&D) is directed to actively work with industry to fill energy storage Codes & Standards (C&S) gaps.

What is the focus of IEEE's Energy Practice?

IEEE's Energy Practice focuses on providing a focal point for information and assistance across the Energy standards and related initiatives. Stay ahead of the curve on the latest Energy activities and projects.

The Modular Energy System Architecture (MESA) Standards Alliance is an industry association of electric utilities and technology suppliers. MESA's mission is to accelerate the interoperability ...

The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the ...

This standard applies to: (1) Stationary battery energy storage system (BESS) and 1 mobile BESS. (2) Carrier of BESS, mainly includes but not limited to lead acid battery, lithium-ion ...

Energy storage, primarily in the form of lithium-ion (Li-ion) battery systems, is growing by leaps and bounds. Analyst Wood Mackenzie forecasts nearly 12 GWh of deployments in 2021 in the ...

The Modular Energy System Architecture (MESA) Standards Alliance is an industry association of electric utilities and technology suppliers. MESA's mission is to accelerate the interoperability of distributed energy resources (DER), in ...
