

Will India achieve 500 GW from non-fossil sources by 2030?

With substantial capacity additions and impressive growth in solar, wind, bioenergy, hydro, and nuclear energy, the country continues to advance towards its ambitious target of achieving 500 GW from non-fossil sources by 2030. Record Capacity Additions Solar and Wind Energy Growth Solar Power

What is India's energy capacity in 2024?

Economic trends indicate that this would constitute roughly 50% of India's total installed energy capacity. As of 2024, however, India sits at 198 GW<sup>3</sup>. This includes renewable energy sources like Solar, Wind, Bio Power, Nuclear, Hydro and Small Hydro sources, (refer Figure 3 below).

How is India advancing Advanced Energy Solutions?

As the world watches, India is progressing advanced energy solutions rapidly. India is setting ambitious targets for deploying advanced energy solutions such as clean hydrogen, energy storage and carbon capture. By 2030, it plans to invest over \$35 billion annually in these areas.

How has India achieved its energy transition goals?

India has set bold ambitions and demonstrated remarkable progress on energy transition investment. For example, it surpassed its 2030 goal of achieving 40% of installed capacity from renewable energy sources nine years in advance.

What will India's energy future look like?

According to Jennifer Granholm, US Secretary of Energy, "In so many ways, the world's energy future will depend on India's energy future." In line with this, the country is adopting ambitious goals for deploying solutions such as clean hydrogen, energy storage, carbon capture and sustainable aviation fuels.

What is India's non-fossil fuel installed capacity?

Total non-fossil fuel installed capacity now stands at 213.70 GW. Overview India has demonstrated remarkable progress in its renewable energy journey, achieving significant milestones across non-fossil fuel sectors between November 2023 and November 2024.

Convex Energy Inc. was founded in March 1978 by Mr. Leo Lalonde and Mr. Bernard Charron at 1555 Chatelain in Ottawa. Rapid growth prompted the lease of 1549 Chatelain to increase warehouse space and make room for future opportunities. Within 5 years, Convex Energy Inc. exceeded all expectations. Many new products were added to inventory ...
