

How does EDP work in El Salvador?

By shifting a significant amount of power supply to natural gas,EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation,offsetting 600,000 tons of carbon dioxide emissions per year,and provides grid support to facilitate more renewable energy penetration,further diversifying the country's energy mix.

What are El Salvador's green energy ambitions?

El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation,which is almost totally owned and operated by the public company CEL (Comisión Hidroeléctrica del Río Lempa),the rest of the generation capacity is in private hands.

How will EDP help El Salvador meet its climate goals?

In addition to meeting nearly one-third of El Salvador's energy demand,EDP is projected to help the country meet its climate goals by reducing carbon emissions by 600,000 tons annually. The project has also been a catalyst for job creation and growth in the country.

Where can I find information about Energia del Pacifico?

To learn more, please visit the Energia del Pacifico website. View our Cookie Policy. This facility brings critical energy infrastructure to El Salvador to meet the country's energy demand.
