

Instructions for use of energy storage inverter

How do you store an inverter?

Store the inverter in a clean and dry place, free of dust and dirt. The storage temperature must be between -40~158°F and humidity should be between 0 to 100%, non-condensing. Do not stack more than two (2) inverters high on a single pallet.

What type of inverter/charger does the energy storage system use?

The Energy Storage System uses a MultiPlus or Quattro bidirectional inverter/charger as its main component. Note that ESS can only be installed on VE.Bus model Multis and Quattros which feature the 2nd generation microprocessor (26 or 27). All new VE.Bus Inverter/Chargers currently shipping have 2nd generation chips.

How to limit the output power of the inverter?

Page 20 ME 3000SP User manual limit the inverter's output power. The inverter can be connected to a RRCR (Radio Ripple Control Receiver) in order to dynamically limit the output power of all the inverters in the installation. Fig.4-4 Inverter-RRCR Connection Table 4-2 Function description of the terminal Pin NO.

How to install a solar inverter?

Do not install the inverter in direct sunlight. Do not install or use the inverter in a humid environment. Make 4 mounting holes in the wall with a drill according to the specified dimensions, insert two expansion screws above and two M5 size screws below for fixing the inverter. Using a screwdriver, remove the terminal protection cover.

How do you mount an inverter?

Mount the inverter on a wall or structure capable of bearing the weight of the machine. The inverter must be mounted vertically with a maximum incline of +/- 5 degree. Exceeding this may cause the output power to derate. To prevent overheating, be sure that the inverter has adequate air flow around it.

What is the setting range of the inverter?

Setting range: 40V~52V, increment of each click is 0.4V, parameter can be set only when battery type is USER and L14/15/16, When the battery voltage falls below this voltage point, the inverter output is switched off immediately.
