

International solar alliance Cocos Keeling Islands

What is the International Solar Alliance?

The International Solar Alliance is an action-oriented, member-driven, intergovernmental organisation for increased deployment of solar energy technologies as a means for bringing energy access, ensuring energy security, and driving energy transition in its Member Countries. 102 Member Countries

What is the International Solar Alliance (ISA)?

Abstract This policy brief explores India's engagement with a new, bespoke climate framework that focuses on solar energy--the International Solar Alliance (ISA). The ISA was envisaged as an alliance of "sunshine states"--a brand-new grouping of solar resource-rich countries that lie between the tropics.

How many countries are members of the International Solar Alliance?

Apart from these, there are 58 other members, such as France, the United States and Japan, making a total of more than 120 members in the alliance. Recently, Greece and Israel joined the International Solar Alliance; thus membership rose to 100. Antigua and Barbados joined in January 2022.

Can ISA rely on non-state actors for solar energy deployment?

Since 2019, the ISA's flagship publication has been a yearly report on the "Ease of Doing Solar in ISA Member Countries" (ISA, 2023c). So far, it has been unable to fully exploit the flexibilities built into the treaty structure to rely on non-state actors for extensive solar energy deployment.

Which countries joined the International Solar Alliance in 2022?

Recently, Greece and Israel joined the International Solar Alliance; thus membership rose to 100. Antigua and Barbados joined in January 2022. Syria joined in February 2022 to become the 103rd member. [citation needed] Later on, Angola joined to raise the total to 104 signatories. [citation needed]

Who is a member of the Solar Alliance?

Following a 2020 amendment to its Framework Agreement, all UN member states are now eligible to join the Alliance. Currently, 100+ countries are signatories, with 90+ countries having ratified to become full members. Its mission is to unlock \$1 trillion in solar investments by 2030 while reducing technology and financing costs.
