

Can a green hydrogen-based energy system help Iraq achieve sustainable economic resilience?

The study investigates the potential of transitioning Iraq, a nation significantly dependent on fossil fuels, toward a green hydrogen-based energy system as a pathway to achieving sustainable economic resilience. As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country foreign exchange earnings.

How can Iraq move towards a renewables-based energy system?

Overall, for Iraq to move towards a renewables-based energy system, it must introduce regulations covering renewable energies, focus on market development, invest in grid retro-fitting, and adopt energy efficiency measures, all of which are currently lacking in Iraq.

Does Iraq need a constant electricity supply?

The most pressing concern for Iraq's electricity sector is the need to secure a constant electricity supply. At operational level, Iraq's electricity infrastructure requires significant investment to rebuilt, retro-fit and expand its overall capacity and to improve efficiencies.

How has war affected Iraq's power infrastructure?

Despite the extraordinary challenges of war in recent years, Iraq has made impressive gains, nearly doubling the country's oil production over the past decade. But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure.

Does Iraq approve a \$153 billion budget?

Ahmed Rasheed and Timour Azhari, Reuters, "Iraq approves record \$153 billion budget including big public hiring," June 11, 2023. International Monetary Fund, 2022 Article IV Consultation with Iraq, February 2023, Table 2, page 27. U.S. Energy Information Administration, OPEC Revenues Factsheet, June 2023.

Does Iraq have a green energy policy?

The establishment of Iraq Renewable Energy and Energy Efficiency Agency in 2010 and the formation of the Iraq Renewable Energy Agency (IREA) in 2016 further solidified the country commitment to green energy. In 2018, the country electric power consumption had risen to 0.75 MWh per capita, and wind energy capacity reached 100 MW.

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages ...

VANTOM POWER is the leading provider of Battery Energy Storage Systems (BESS) in Iraq. During more than 10 years of experience in the energy storage industry, we have ... ??????? ????
