

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Should Iraq rely on state financing for energy projects?

There has scarcely been a more urgent time for Iraq to pursue crucial reforms in its energy sector to ensure that investment continues even when government revenues have been decimated by low oil prices. The alternative of continuing to rely on direct state financing of large projects only increases the risk that these projects are delayed.

Will IEA support Iraq's Energy reforms?

As Iraq's newly formed government begins to tackle the long list of considerable challenges it faces, the IEA stands ready to support the country in its efforts to enact the reforms that will help its energy sector - and its economy - meet its vast potential.

Does Iraq allow private investment in the oil sector?

Unlike some of its regional neighbors, such as Iran and Kuwait, Iraq's Constitution allows private investment in the oil sector if the investment model aligns the interests of investors with those of the host government.

Will Iraq still have a 2 billion cubic feet deficit per day?

Jafar predicted that there may still be a 2 billion cubic feet deficit per day, which could require imports unless exploration efforts are increased in Iraq. The goal should be providing 24-hour electricity for Iraqi citizens, which is critical for stability and economic development.
