

What is Iraq's energy supply like in 2022?

As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country's foreign exchange earnings. The global energy landscape is rapidly shifting towards cleaner alternatives, and the volatility of oil prices has made it imperative for the country to diversify its energy sources.

How much energy does Iraq use?

Iraqi energy consumption witnessed fluctuations and a gradual increase from 2010 to 2021, as depicted in figure 2. The energy consumption in 2010 stood at 129.7 terawatt-hours (TWh). Over the next few years, there was a steady rise, with consumption reaching 139.5 TWh in 2011 and 146.9 TWh in 2012.

Does Iraq have a green energy policy?

The establishment of Iraq Renewable Energy and Energy Efficiency Agency in 2010 and the formation of the Iraq Renewable Energy Agency (IREA) in 2016 further solidified the country's commitment to green energy. In 2018, the country's electric power consumption had risen to 0.75 MWh per capita, and wind energy capacity reached 100 MW.

Can a green hydrogen-based energy system help Iraq achieve sustainable economic resilience?

The study investigates the potential of transitioning Iraq, a nation significantly dependent on fossil fuels, toward a green hydrogen-based energy system as a pathway to achieving sustainable economic resilience. As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country's foreign exchange earnings.

Does Iraq produce hydrogen?

Given Iraq's significant natural gas reserves, the country could technically produce substantial amounts of grey hydrogen. However, due to the environmental impact and the global push towards more sustainable energy solutions, there may be more focus on cleaner hydrogen production methods, such as green and blue hydrogen production. 3.4.

How much oil does Iraq produce a day?

It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil production will grow by 1.3 million barrels a day by 2030, becoming the world's fourth-largest oil producer behind the United States, Saudi Arabia and Russia.

Verse Oil Service Co. have begun with a focus on oil trading. Verse activities now encompass all key energy products and a wide range of dry bulk commodities. We have also grown the ...

Growatt is a global leading distributed energy solution provider, specializing in sustainable energy generation,

storage and consumption, as well as energy digitalization for residential and ...

This report maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector. It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil ...
