

Is Iraq suitable for solar energy exploitation?

Iraq geographical location is quite suitable for solar energy exploitation, as it is located in the southwestern side of the Asian continent extending between $(29.50-37.22^{\circ} \text{ N})$ and $(38.45-48.45^{\circ} \text{ E})$ (Shubbar et al. 2016; Jassim and Goff 2006).

Why should the Iraqi government use renewable resources?

The depletion of oil and gas resources is another reason that should motivate the Iraqi government for utilization of renewable resources as it could provide the security and diversity in energy supply (Chen et al. 2016; Li and Yao 2020; Kazem and Chaichan 2012).

Why is Iraq's energy system vulnerable?

However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand. This has introduced a number of vulnerabilities to Iraq's energy system.

How much oil does Iraq produce a day?

It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil production will grow by 1.3 million barrels a day by 2030, becoming the world's fourth-largest oil producer behind the United States, Saudi Arabia and Russia.

How has war affected Iraq's power infrastructure?

Despite the extraordinary challenges of war in recent years, Iraq has made impressive gains, nearly doubling the country's oil production over the past decade. But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure.

Is EIA energy outlook in Iraq good for 2020 year?

The estimation for 2020 year is in good agreement with EIA energy outlook in Iraq for the year 2019.

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages ...

In this report, the authors present an overview of the status of the electricity sector in federal Iraq with a focus on the key challenges it is facing, before discussing a roadmap towards energy transition, and the major steps ...

Request PDF | On Mar 1, 2023, Mohammed Jasim M. Al Essa published Energy assessments of a photovoltaic-wind-battery system for residential appliances in Iraq | Find, read and cite all the ...

This report maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector. It also takes a detailed look at the country's oil and gas sector, projecting that Iraq's oil ...

Iraq's energy sector is heavily dependent upon oil, with revenues from crude oil exports accounting for over two-thirds of the country's GDP, and the country's significant gas reserves ...
