

Can a green hydrogen-based energy system help Iraq achieve sustainable economic resilience?

The study investigates the potential of transitioning Iraq, a nation significantly dependent on fossil fuels, toward a green hydrogen-based energy system as a pathway to achieving sustainable economic resilience. As of 2022, Iraqi energy supply is over 90% reliant on hydrocarbons, which also account for 95% of the country foreign exchange earnings.

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage(PHS) has the largest share of installed capacity in MENA at 55%,as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies,which explains its dominance in the global ESS market.

Does Iraq produce hydrogen?

Given Iraq significant natural gas reserves,the country could technically produce substantial amounts of grey hydrogen. However,due to the environmental impact and the global push towards more sustainable energy solutions,there may be more focus on cleaner hydrogen production methods,such as green and blue hydrogen production. 3.4.
