

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Should Iraq rely on state financing for energy projects?

There has scarcely been a more urgent time for Iraq to pursue crucial reforms in its energy sector to ensure that investment continues even when government revenues have been decimated by low oil prices. The alternative of continuing to rely on direct state financing of large projects only increases the risk that these projects are delayed.

Why is Iraq facing a major energy crisis?

Already in a fragile state, Iraq's economy is today facing a major crisis resulting from the impact of the Covid-19 pandemic on global oil markets, underscoring the urgent need for reforms of the country's energy sector.

Will IEA support Iraq's Energy reforms?

As Iraq's newly formed government begins to tackle the long list of considerable challenges it faces, the IEA stands ready to support the country in its efforts to enact the reforms that will help its energy sector - and its economy - meet its vast potential.

Does Iraq allow private investment in the oil sector?

Unlike some of its regional neighbors, such as Iran and Kuwait, Iraq's Constitution allows private investment in the oil sector if the investment model aligns the interests of investors with those of the host government.

How can Iraq improve energy sustainability?

According to Jafar, current operations in Iraq, like reducing carbon dioxide emissions and using natural gas to enable renewable sources, are vital to developing energy sustainability and contributing to the global climate agenda.
