

Who is E24?

E24 is an end to end energy solution provider. E24 offers turnkey Energy Generation, Conversion, Storage, Transmission and Billing Solutions.

Will the Isle of Man be short of baseload power?

Both UK and RoI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

Can we build more than the Isle of Man's first offshore wind farm?

Together we can build more than the Isle of Man's first offshore wind farm- we can lay the foundation for lasting economic investment, develop skills, create jobs, and protect and enhance the marine environment.

How much carbon dioxide will ESC emit in 30 years?

With a population of 85,000 people currently relying on oil and gas for power, heating and transport, within 30 years the Island will move from emitting around 700,000 tonnes of carbon dioxide per annum to none. Significant benefits will come by learning from one another in the educational environment of ESC.
