How big is Italy's energy storage sector?

However, permitting bottlenecks remain a key concern. Figures by industry group Italia Solare put the current size of the Italian energy storage sector at approximately 450MWof total installed capacity.

How much solar power does Italy have?

The cumulative capacity of all storage systems deployed in Italy reached 734.4MWhby the end of December. Around 720MWh is represented by lithium-ion batteries. Italy's National Integrated Plan for Climate and Energy aims for 50GW of solar by 2030. This content is protected by copyright and may not be reused.

How much storage capacity is installed in Italy?

Furthermore,Italia Solare reports that 431.42MWhof storage capacity was deployed in Italy last year. This compares to 111.9MWh in 2020,79.6MWh in 2019,and 55.3MWh in 2018. Most of the new storage capacity was installed in the northern regions of Lombardia and Veneto,which are both supporting storage with dedicated incentive schemes.

How much solar storage will Italy need by 2025?

Italian transmission system operator (TSO) Terna said that 1GWof storage linked to solar farms will be needed by 2025 to help maintain system adequacy, with additional 6GW of utility-scale storage needed by 2030. The majority of revenue for storage assets comes from participation in Terna's fast reserve scheme.

Who has the largest battery storage capacity in Italy?

With 60MW,Enel-Xclaimed the largest awarded capacity in the first pilot tender followed by French utility Engie with 44MW,Metka Egri Apulia with 26MW and Iren with 25.5MW. Market participants have identified permitting issues as the main obstacle to greater growth in Italy's battery storage sector.
