

Italian south sudan energy storage power station

How much power does South Sudan need?

South Sudan's installed power capacity is about 130 megawatts, a large chunk of which is used to supply electricity to the country's abundant oil fields. However, the country's power demand is about 300 megawatts, an amount that's likely to grow during peacetime, Deng said. "We are actually thirsty [for generation]," he said.

Does Sudan have enough energy?

Following the separation of oil-rich South Sudan from Sudan in 2011, Sudan has struggled to provide enough energy from sustainable sources to satisfy the growing needs of domestic household, industrial, and agricultural consumption [6].

Can Sudan become an energy exporter?

Meantime, Sudan can import cheap electricity from Egypt's Aswan Dam and Ethiopia's Renaissance Dam using current interconnections. Perhaps one day a developed RE system can enable Sudan to become an energy exporter. No potential conflict of interest was reported by the author (s).
