

Will Italy ban ground-mounted solar PV projects on agricultural land?

The government rules constitute a complete ban on ground-mounted solar PV projects on land classed as agricultural. The policy is intended to preserve Italy's productive agricultural land and "put an end to the wild installation of ground-mounted photovoltaics," according to agriculture minister Francesco Lollobrigida.

Can solar be installed on agricultural land in Italy?

The Italian government has issued a new decree to completely ban solar from agricultural land. The new provisions will not apply to projects currently undergoing the approval process. From pv magazine Italy The Italian government has issued a new decree that prohibits the deployment of large-scale solar plants on productive agricultural land.

Will Italy's rightwing coalition stop solar panels on agricultural land?

REUTERS/Claudia Greco/File Photo Purchase Licensing Rights ROME, May 6 (Reuters) - Italy's rightwing coalition on Monday passed rules curbing the installation of solar panels on agricultural land, ministers said, in a move that triggered criticism as it could undermine Rome's decarbonisation goals.

Why is Italy implementing a ground-mounted photovoltaic policy?

The policy is intended to preserve Italy's productive agricultural land and "put an end to the wild installation of ground-mounted photovoltaics," according to agriculture minister Francesco Lollobrigida. PV Tech has been running PV ModuleTech Conferences since 2017.

Will agrivoltaic projects be banned?

However, the decree will not prevent agrivoltaic projects where solar panels are installed above fields of crops without interfering with productivity. Solar plants on non-productive agricultural land such as quarries and solar facilities financed under the recovery and resilience plan framework will also be exempt from the ban. Have you read?
