In today's world, the energy requirement has full attention in the development of any country for which it requires an effective and sustainable potential to meet the country's needs. Thermal energy storage has a complete ...

Desalination is a water treatment process to separate salt from a salt solution to produce drinking water or water with low TDS. The technology used uses Thermal Energy as ...

The heat transfer coefficient of a heat exchanger is easily affected by the heat flow rate (corresponding to the load rate of compression/power generation) while working on ...

Recent studies have focused on improving the thermal performance of PCM HXs by optimizing the spacing and geometry of fins to maximize the energy storage capacity of the system [54, ...
