

What is a rangebank Bess?

The Rangebank BESS helps to increase Victoria's renewable energy hosting capacity and provides essential system services that support the safe, secure and reliable operation of Australia's energy system.

Who is constructing the rangebank Bess project?

The project is proudly being developed by Eku Energy and Shell Energy Australia. The Rangebank BESS will be built, serviced, and maintained by Fluence- a global leader in energy storage products and services within the renewable energy and storage sectors.

What is the storage capacity of the rangebank Bess project?

The Rangebank BESS project will feature a storage capacity of 200MW. Credit: Fluence Energy. The Rangebank BESS project will feature a storage capacity of 200MW. Credit: Fluence Energy. The Rangebank BESS project will feature a storage capacity of 200MW. Credit: Fluence Energy.

How much power does a rangebank Bess deliver?

The Rangebank BESS will deliver 200MW/400MWh of dispatchable power over two hours using Fluence Energy's Gridstack (TM) grid-scale energy storage system. The BESS features a modular design, consisting of an array of equipment that includes batteries, core transformers, inverters, and a large transformer.

Who builds the rangebank Bess battery?

The Rangebank BESS will be built, serviced, and maintained by Fluence- a global leader in energy storage products and services within the renewable energy and storage sectors. The battery, built within a 19,250sqm footprint, will utilise Fluence's sixth generation Gridstack(TM) energy storage technology.

How long will the rangebank Bess battery last?

Shell Energy will have access to the battery's entire offtake for 20 years. Once operational, the Rangebank BESS will have the capacity to power 80,000 Victorian homes for one hour during peak times, which is equivalent to supplying five hours of energy to 31,000 households in Cranbourne.

The Rangebank BESS, Victoria's second largest storage system, was officially opened on 3 December 2024 by The Hon. Lily D'Ambrosia MP, Victorian Minister for Energy & Resources, together with Tom Best, Chief Operating Officer Eku Energy, Tony Keeling, Australia Chief Executive Officer Shell Energy, Steven Murphy, Perfection Private, and Jason ...

Rangebank BESS will play a crucial role in helping stabilise Victoria's state electricity supply by providing additional storage capacity which can be discharged at times of peak demand. Situated in the Rangebank Business Park in Melbourne's southeast, the jointly developed 200 MW/400 MWh BESS has the capacity to power 80,000 homes for an ...

Pre-construction activities commenced this week on Rangebank BESS, a 200MW/400MWh project in Victoria, Australia. Victoria energy and resources minister Lily d'Ambrosio was among dignitaries in attendance to help ceremonially mark the start of work on the project at Rangebank Business Park in Cranbourne, southeast Melbourne.

Jointly developed by United Kingdom-headquartered energy storage business Eku Energy and Queensland-headquartered gen-tailer Shell Energy Australia, the Rangebank 200 MW / 400 MWh battery energy storage system (BESS) has successfully been energised.. Diversified energy network business AusNet Victoria's transmission connection team ...

Shell Energy Operations (Shell Energy) has partnered with Macquarie Asset Management's Green Investment Group (GIG) to deliver a utility-scale battery energy storage system (BESS) in Cranbourne, Victoria in Australia.. Once fully operational, the 200MW/400MWh Rangebank BESS will have the capacity to power the equivalent of 80,000 homes across Victoria for an hour ...

The Rangebank BESS will increase Victoria's renewable energy hosting capacity while providing essential system services aiming to support the safe, secure and reliable operation of Australia's power system. Once fully operational, the Rangebank BESS will have the storage capacity to power the equivalent of 80,000 Victorian homes for an hour ...

The Rangebank BESS, Victoria's second largest storage system, was officially opened on 3 December 2024 by The Hon. Lily D'Ambrosia MP, Victorian Minister for Energy & Resources, together with Tom Best, Chief Operating Officer Eku Energy, Tony Keeling, Australia Chief Executive Officer Shell Energy, Steven Murphy, Perfection Private, and Jason Beer, ...

"Rangebank BESS is an important addition to Shell Energy's battery portfolio being our first grid-scale battery investment in Victoria and Shell's first direct equity investment in a utility ...

"Rangebank BESS is an important addition to Shell Energy's battery portfolio being our first grid-scale battery investment in Victoria and Shell's first direct equity investment in a utility-scale BESS globally," he said, adding that it will help deliver a more reliable energy supply for customers as the energy market continues to evolve.

Less than 18 months after the start of construction, the 200 MW/400 MWh Rangebank BESS, first energized in August 2024, has officially commenced full operations. The battery is helping to stabilize Victoria's electricity supply by providing additional energy storage capacity that can be discharged at times of peak

demand.

The Rangebank BESS, Victoria's second largest storage system, was officially opened on 3 December 2024 by The Hon. Lily D'Ambrosia MP, Victorian Minister for Energy & Resources, together with Tom Best, Chief Operating Officer Eku Energy, Tony Keeling, Australia Chief Executive Officer Shell Energy, Steven Murphy, Perfection Private, and ...

The Rangebank BESS is pleased to report, following the mobilisation of construction resources in June 2023 under the early works pre-construction approvals, that the project has achieved significant milestones in both the regulatory and delivery elements of the works. Read more.

The Rangebank BESS will be built and maintained by Fluence, utilising Fluence's sixth generation Gridstack energy storage technology. All going well, construction is set to commence this quarter. The project has all its ducks lined up; with land, development approvals and financing secured. Among the financiers is Westpac.

The Rangebank BESS, Victoria's second largest storage system, was officially opened on 3 December 2024 by The Hon. Lily D'Ambrosia MP, Victorian Minister for Energy & Resources, together with Tom ...

The Rangebank BESS will increase Victoria's renewable energy hosting capacity and provide essential system services that will support the safe, secure and reliable operation of Australia's energy system. Lily D'Ambrosio, Minister for Energy and Resources said, "Grid-scale big batteries like this one are crucial in helping Victoria ...
