

# Japan and germany hydrogen energy storage

Is hydrogen a good investment for Japan?

As mentioned by Chief Cabinet Secretary Matsuno Hirokazu at a cabinet meeting on June 6, the Japanese government considers hydrogen to be "an industrial sector that can make a triple achievement of decarbonization, stable energy supply and economic growth in one shot."

Are hydrogen storage technologies sustainable?

The outcomes showed that with the advancements in hydrogen storage technologies and their sustainability implications, policymakers, researchers, and industry stakeholders can make informed decisions to accelerate the transition towards a hydrogen-based energy future that is clean, sustainable, and resilient.

Which countries formulated their own hydrogen strategies after Japan?

It stimulated the creation of energy policies in other countries; Australia, the European Union, Canada, Chile, France, Germany, Hungary, the Netherlands, Norway, Portugal, South Korea, and Spain all formulated their own hydrogen strategies after Japan.

Does Japan have a hydrogen supply chain?

The Kishida administration has promoted the establishment of international hydrogen supply chains in cooperation with countries in the Indo-Pacific, Europe, and the Middle East. Both the public and private sectors in Japan have already developed partnerships with countries such as Australia and the United Arab Emirates.

What will Japan do with hydrogen?

Aiming for a delivered cost of hydrogen of JPY30/Nm<sup>3</sup> by 2030. 30% hydrogen co-firing in gas power plants by 2030. Hydrogen/ammonia to comprise 1% of Japan's overall power mix by 2030. Substantial ongoing public-private co-investment in R&D and pilot projects, particularly in relation to hydrogen transportation technologies.

Will Japan build a hydrogen and ammonia supply chain?

Japanese trading house Itochu Corp (8001.T) on Monday said it is conducting a feasibility study of building hydrogen and ammonia supply chain in Kitakyushu in southern Japan, one of the future offshore wind hubs in the country. (\$1 = 157.2800 yen) The Reuters Power Up newsletter provides everything you need to know about the global energy industry.

However, its energy-to-volume ratio, exemplified by liquid hydrogen's 8.5 MJ.L<sup>-1</sup> versus gasoline's 32.6 MJ.L<sup>-1</sup>, presents a challenge, requiring a larger volume for equivalent ...

This hydrogen storage system is connected to the electricity supply via a fuel cell, making it a high energy, long-term storage system in the micro smart grid. The Living Lab ...

Germany and Japan have both gained substantial experience with hydrogen production and applications, albeit with focus on different sectors. They also share similar drivers for hydrogen development and, of course, similar ...

Germany is set to boast more Hydrogen Valleys than any other country in the world by 2033. 7. How does the automotive industry in Germany tie into the hydrogen economy? Germany's car manufacturing sector, valued at ...

of a metaanalysis of the role of hydrogen in 18 long- term energy system scenarios for - Germany and 12 scenarios for Japan, of this study draws conclusions on Chapter 2 the possible future ...

converted and newly built hydrogen pipelines will be built in Germany by 2027/2028 via IPCEI („Important Project of Common European Interest") funding o Approx. 4,500 km will be added ...
