

The ministry set a fixed FIT of USD 0.096/kWh for PV systems with capacities between 10 kW and 50 kW and a FIT of USD 0.087/kWh for installations between 50 kW and 250 kW. Thus, ...

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar ...

Japan is one of the most talked-about emerging grid-scale energy storage markets in Asia, and as such, it featured prominently at the Energy Storage Summit Asia, held in Singapore earlier this month. Andy ...

RTS Corporation has modelled various scenarios and found that Japan could potentially find itself host to 150GW of PV generation by 2030. Indeed, the government's three-year Basic Energy Plan aims for renewables ...

Japan's planned grid-scale battery storage system (BESS) will also need multiple revenue streams to remain viable, however, and a series of market reforms have been designed to sustain it. Drawing on data from our ...

Gore Street Capital ("Gore Street") is pleased to announce that it has successfully completed a fundraising round for Japan's first fund dedicated to grid-scale energy storage systems, "Tokyo Energy Storage Investment ...

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever-growing renewables curtailment numbers nationwide, more and more firms are tapping ...

It is Eku Energy's first project in Japan to reach financial close and will be located in Miyazaki City, the capital of Miyazaki Prefecture on the southern island of Kyushu. The 30MW asset will be 4-hour duration ...
