

3 ???· Japan has been a world leader in hydrogen research; in 2017, Japan became the first country to formulate a basic hydrogen strategy, positioning hydrogen as a viable new energy ...

For hydrogen-based energy storage and fuel to become more widespread, it needs to be safe, very efficient, and as simple as possible. Current hydrogen-based fuel cells used in electric cars work by allowing hydrogen ...

1. Introduction. Hydrogen absorption materials can absorb and desorb hydrogen by controlling its gas pressure and temperature. This field of study is important mainly in terms of hydrogen ...

Researchers led by Genki Kobayashi at the RIKEN Cluster for Pioneering Research in Japan have developed a solid electrolyte for transporting hydride ions (H ⁻) at room temperature. This breakthrough means that the ...
