

Should I install a home battery system?

Peace of mind is one of the primary benefits that a home battery provides. So while you may not be able to go fully off-grid (or at least without spending a lot of money to do so), you will be able to power your home without the grid. If you're ready to install a home battery system, we're here to help.

Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

What is a home battery & how does it work?

Home batteries store energy generated by your solar panels or from the grid during off-peak hours, so you can use it later when energy prices are higher or during power outages. They typically use Lithium-ion batteries, which are more efficient and durable than other battery technologies.

What is the best battery storage system?

Our top pick is Generac PWRcell. We independently evaluate all recommended products and services. If you click on links we provide, we may receive compensation. Learn more. Home battery storage systems have skyrocketed in popularity during the past few years for many different reasons.

Should I add a battery to my home?

Most batteries last about 10-15 years, meaning you'll have plenty of time to break even on your investment. While many homeowners can benefit from installing a battery system, they're not right for everyone. Here are a few questions to answer when deciding if you should add a battery to your home: Do you frequently experience power outages?
