

What is Jersey Electricity Group?

Jersey Electricity Group consists of several complementary businesses beyond energy supply. Find out what else we do. A low carbon future is within our power. And it's projects like these that'll ensure a robust, reliable, low-carbon, sustainable electricity supply for generations.

Will Jersey electricity invest \$120m in the 'largest ever' upgrade?

Jersey Electricity (JE) has revealed a plan to invest \$120m in the 'largest ever' upgrade to the island's network. The firm said the five-year upgrade would support an 'all-electric future' and ensure every home and business could access affordable and sustainable energy.

When was Jersey electricity company founded?

The Jersey Electricity Company was founded in April 1924, with a small generating station at the end of Albert Pier. Within a decade it had moved to a new, bigger power station at Queen's Road, the site of today's Powerhouse retail park and administration offices.

Will Jersey's 'over and above' project 'bear with' customers?

The project would be 'over and above' an existing programme of works, it added, to meet a predicted 25% increase in demand. Mark Preece, chief operating officer (COO) of Jersey Electricity, said customers would see works around the island and this could 'cause frustrations' but appealed for islanders to 'bear with' them.

Energy Technologies, Inc. (ETI) has been developing innovative power solutions to meet a myriad of requirements and application scenarios for over 25 years. This includes our global, intelligent and rugged: backup power systems, power conditioners, generators, power distribution and environmental control units.
