

Can a new energy storage facility be built in Israel?

(Sue Surkes/Times of Israel) An Israeli company that has developed a unique method of storing renewable energy using air and water announced Wednesday that it has signed an \$8 million agreement in principle with the Israel Electricity Corporation to build the first facility of its kind in the world, in Dimona, southern Israel.

Will Israel create a 'kosher' energy network for ultra-Orthodox Jews observing the Sabbath?

REUTERS/Mussa Qawasma JERUSALEM, May 7 (Reuters) - Israel approved on Sunday a plan to create an energy storage network in cities to produce off-peak electricity, which will also supply "kosher" electricity for ultra-Orthodox Jews observing the Sabbath.

Are lithium-ion batteries a good choice for energy storage?

Lithium-ion batteries are being widely deployed in vehicles, consumer electronics, and more recently, in electricity storage systems. These batteries have, and will likely continue to have, relatively high costs per kWh of electricity stored, making them unsuitable for long-duration storage that may be needed to support reliable decarbonized grids.

Deploying battery energy storage systems will provide more comprehensive access to electricity while enabling much greater use of renewable energy, ultimately helping the world meet its Net Zero ...
