

Yinping Qin, Hongyu Cheng, Jingjing Zhou, Meng Liu, ... Bingkun Guo. Pages 411-420 View PDF. Article preview. ... [Energy Storage Materials Volume 19, May 2019, Pages 56-61] Feng Yu, ...

Advanced Energy Materials is your prime applied energy journal for research providing solutions to today's global energy challenges. ... Dimensionality, Function and Performance of Carbon Materials in Energy ...

Semantic Scholar extracted view of "Recent advances in tin-based anode materials for potassium-ion batteries" by Jingjing Zhang et al. ... Published in Journal of Energy Storage ...

Energy storage not only reduces the mismatch between supply and demand but also improves the performance and reliability of energy systems and plays an important role in conserving the energy. ... Thermal conductivity ...

Recent progress on transition metal oxides as advanced materials for energy conversion and storage. Shuang Yuan, Xiao Duan, Jiaqi Liu, Yun Ye, ... Xinbo Zhang. Pages 317-369 View ...

Advanced Materials, one of the world's most prestigious journals, is the home of choice for best-in-class materials science for more than 30 years. ... Consequently, the MLCC device exhibits ...

Lithium-ion batteries (LIBs) with LiFePO₄ cathode are widely used in electric vehicles and energy storage systems owing to their cost-effectiveness and safety. However, this type of LIBs is ...

Layered oxide materials have been favored as cathodes in lithium-ion batteries (LIBs) for their high voltage plateau and specific capacity [1], [2], [3]. To meet the needs of ever ...

A living organism is a complex "biosynthesis factory" for the fabrication of materials under environmentally benign conditions, which is worth studying to extend synthesis techniques. ...

As a type of device for the storage and stable supply of clean energy, secondary batteries have been widely studied, and one of their most important components is their cathode material. ...

Up to now, lithium-ion batteries (LIBs) have occupied a major market share, but their further application is hampered by the high cost of lithium supplies and serious safety ...

Despite lithium-rich layered oxides (LLO) are promising candidates for the next-generation cathode materials, the rapid voltage and capacity decay, caused by structural degradation, are ...

Energy Storage Materials is an international multidisciplinary journal for communicating scientific and technological advances in the field of materials and their devices for advanced energy ...

Ferroelectric ceramic capacitors show great potential in pulse power devices for their fast charging-discharging characteristics and immense power density. As a relaxation ferroelectric ...

Improving energy density and other properties may help these materials be more competitive with batteries for energy storage applications. Pan et al. introduced a specific type of nanodomain ...
