

"As Jepco uplevels its smart grid, Itron's solution will play a critical role in its digital transformation" Jepco serves two thirds of Jordan's total electricity consumers. Being the country's leading energy provider, enabling ...

As a country, Jordan is heavily reliant on fossil fuels to meet its energy needs. As of 2021, 73% of the total generation was from natural gas, with only 26% from renewable sources [].Therefore, great benefit can be derived from converting the electrical grid into a smart grid, primarily owing to its potential to enhance the reliability and efficiency of the electric grid ...

The implementation of a smart grid in Jordan offers many potential advantages, such as improved reliability and efficiency of the power grid, expanded integration of renewable energy sources, enhanced control and monitoring capabilities for the utility, and cost savings and economic benefits. ... This research paper provides an overview of the ...

The smart grid lab at GJU is established in 2018 and includes a research team that focuses on smart grid topics to conduct several research topics. The research group works in three areas: energy management and renewable energy systems, storage systems and electric vehicles, smart sensors, and precision devices.

Jordan Smart Grid Options Final Report Dissemination Workshop - Amman, August 22 2023. ... This will contribute to the implementation of Jordan Energy Strategy 2020 - 2030 and the Jordan ...

?Jordan University of Science and Technology? - ??Cited by 2,031?? ... Smart Grid and Renewable Energy 6 (01), 1, 2015. 47: 2015: Optimal design for sensible thermal energy storage tank using natural solid materials for a parabolic trough power plant. K Bataineh, A Gharaibeh. Solar Energy 171, 519-525, 2018. 46:

"As Jepco uplevels its smart grid, Itron's solution will play a critical role in its digital transformation" Jepco serves two thirds of Jordan's total electricity consumers. Being the country's leading energy provider, enabling data quality allows Jepco to focus on delivering business outcomes such as ensuring energy security.

Decarbonizing Jordanian Energy Systems Utilising Smart Solutions based on Energy Storage. Green Hydrogen and Power-to-X for University Students Capacity-Building for Jordan's Future Workforce. Advanced Teaching and training on Smart grid & Grid Integration of Renewable Energy Systems. Modeling and Simulation Distributed Energy Resources in ...

Held up as a global model by investors, Jordan's decarbonization program catalyzed US\$4 billion in private investment for the development of renewable energy and smart grid technologies. Yet energy transition is experienced in powerfully uneven ways, as distributed solar and advanced metering technologies remake the

spaces of urban life.

PDF | On Oct 26, 2021, Hamza Alnawafah and others published Modeling and Control for Hybrid Renewable Energy System in Smart Grid Scenario - A Case Study Part of Jordan Grid | Find, read and cite ...

Keywords: smart grid, renewable energy, microgrids, advanced metering infrastructure, energy management systems, demand response, distribution automation. ... smart grid in Jordan is the potential ...

According to a recent report published by EDAMA on the prospects and challenges of smart meters in Jordan, multiple opportunities are presented for improving grid management in the country, influencing the energy consumption behavior of users, stabilizing the cost of electricity and developing adequate energy storage solutions.

ing a smart grid. An energy network with a smart grid monitors and regulates the flow of electric-ity between generators, customers, and grid op-erators using digital communications technology [Fang et al. 2012]. The introduction of a smart grid in Jordan may assist to alleviate some of the issues the nation's electrical industry is now fac-

Roadmap to Transit the Electrical Grid to a Secure Smart Grid: A Collaborative Approach for Regulatory and Governmental Reforms in the Kingdom of Jordan December 2023 DOI: 10.20944/preprints202312 ...

A. Qasaimeh, "Solar Energy Optimization through Seasons: Case Study in Jordan," Smart Grid and Renewable Energy, Vol. 3 No. 4, 2012, pp. 275-281. doi: 10.4236/sgre.2012.34038. 1. Introduction. Solar energy is a vital renewable energy due to its availability, continuity, and cleanness. Jordan is characterized by high solar radiation among ...

Design and Simulation of a Renewable Energy-Based Smart Grid for Ma'an City, Jordan: A Feasibility Study Mais Alzgool*, Abdullah Adnan Khalaf, Omran Nasan, Laith Khatabi, ... Jordan. 2. METHODOLOGY In this study, Ma'an governorate has been chosen to be the case study to present an integration method of RESs. As PVit is a
