

Kit solar hibrido 10000w Trinidad and Tobago

What are the solar photovoltaic systems in Trinidad and Tobago?

In Trinidad and Tobago and the wider Caribbean there is an abundance of natural energy from the sun. In Trinidad and Tobago a typical day can be insolated for 5-6 hours of sunlight. This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago. The cost for these systems are constantly coming down.

Is Trinidad ready for more solar power?

Every person involved in the process has certified solar installation training. Didn't know that was a thing in Trinidad, right? We're definitely ready for more solar power to make a better, more eco-friendly and sustainable world for us all. We understand that solar power is a bit more expensive than other power systems.

Why should you choose trifactor solar?

WHY CHOOSE US? Trifactor Solar is comprised of persons who have established their competence and good reputation in the respective fields undertaken by the company. They deliver, in no small measure, a wealth of knowledge, skills, experience and commitment to get the job done.

Applications which we offer for Solar are grid tie, off grid, standby power (when utility fails). AMBA Energy Limited can design a system to suite your application. While Solar PV is readily available in Trinidad and Tobago, irradiated heat is ...
