

Hydrogen has an important role to play in the decarbonization of industry and transport sector. While hydrogen produced from renewable electricity is an important part of the low carbon future, nuclear hydrogen is also equally clean and has considerably higher potential to contribute to future energy scenario for deep decarbonization. Various hydrogen production ...

The unit specifically promotes efficient energy cooking stoves, bio-gas, solar energy and briquette making. It also supports natural resource related disaster risk reduction initiatives, massive tree planting including establishment and management of community tree nurseries and restoration of degraded forests.
