

What is battolyser &#174;?

The patented technology produces a highly efficient electrolyser that can also store and supply power like a battery. The system has the flexibility to follow the most volatile power markets, is scalable and made from only abundant and recyclable materials. All in all, Battolyser &#174; offers the lowest cost and only true green hydrogen.

Where is battolyser systems located?

Battolyser Systems is located in Schiedam, Zuid-Holland, The Netherlands. Who invested in Battolyser Systems? Battolyser Systems is funded by European Investment Bank. How much funding has Battolyser Systems raised to date?

What is battolyser &#174; 25MW?

Battolyser &#174; 25MW is our large-scale system. Designed for generating green hydrogen at scale and at the lowest possible Levelised Cost of Hydrogen. Want to learn more? [GREEN HYDROGEN...](#)

How can battolyser &#174; achieve the lowest power cost?

Battolyser &#174; can achieve the lowest power cost, thanks to its high efficiency and ability to arbitrage between selling power and producing hydrogen. Battolyser &#174; has the unique capacity to produce 100% green hydrogen, instantly following local intermittent renewable energy sources. It is the solution to move towards a net zero energy system.

What is battolyser &#174; 5MW?

The Battolyser &#174; 5MW is a 5MW/MWh system, skid mounted and can be delivered with a fully equipped Balance of System. Delivery Q2 2025 Battolyser &#174; 25MW is our large-scale system. It is designed for installations ranging from 10 to 500 MW, generating green hydrogen at scale and at the lowest possible Levelised Cost of Hydrogen.

What can battolyser systems do for You?

Typically, Battolyser Systems can deliver solutions that add value in on and off-grid applications as well as in flexible and base load hydrogen offtake applications. Battolyser Systems has taken a groundbreaking step by developing the world's first integrated battery electrolyser system, known as the Battolyser &#174;.

Battolyser Systems devrait commencer par proposer un mod&#232;le de 2,5 MW de puissance associ&#233; &#224; une batterie de 800 kWh de capacit&#233;. D&#232;s le deuxi&#232;me trimestre 2025, le fabricant esp&#232;re lancer un mod&#232;le &#224; la puissance deux fois ...

Le syst&#232;me Battolyser, cr&#233;&#233; aux Pays-Bas, constitue une v&#233;ritable innovation qui permet d'associer batteries et production d'hydrog&#232;ne propre, le tout avec de belles ...

Battolyser® can store and supply electricity as a battery. When fully charged it automatically starts splitting water into hydrogen and oxygen, acting as an electrolyser with an outstanding efficiency. Battolyser® is extremely flexible ...
