

Is SolarSpace launching a 5GW high-efficiency solar cell plant in Laos?

SolarSpace, a China-based PV cell and module manufacturer, announced the first phase of a 5GW high-efficiency solar cell plant in Laos, giving momentum to its overseas production capacity. SolarSpace marked the start of the first phase of its 5 GW high-efficiency solar cell plant in Laos at a recent launch event in the Saysettha Development Zone.

Why is SolarSpace launching a solar project in Laos?

The company said it has an experienced production and management team in Laos, and those people will play a leading role in the development of the nation's clean energy industry. Laos is a new manufacturing location for SolarSpace, which has traditionally been more active in solar projects in the country.

Does Laos have a solar sector?

The news is also a positive development for the Laos solar sector. Last year, the country began construction on its first large-scale solar farm, a 50MW project in the south-east province of Attapeu, and the government has already made plans to expand its solar sector further.

Is Laos a good country to invest in solar?

The government aims to increase the contribution of renewables to 11% by 2025, and while SolarSpace did not specify where its Laos-made modules would be shipped, the presence of a major manufacturing facility in the country is an important step in demonstrating the viability of Laos as a country capable of significant solar investment.

How much renewable electricity will Laos generate by 2035?

The Energy Market Authority has already attracted proposals for 1.2 GW of renewable electricity, to be generated in four southeast Asian nations, and wants to raise that figure to 4 GW by 2035. EDF is planning to build a 240 MW floating PV project at Laos' largest hydropower dam.

Where will SolarSpace manufacture high-efficiency solar cells?

The plant will manufacture high-efficiency cells, although the specific type was not disclosed. The factory is SolarSpace's first PV manufacturing plant in Laos and its latest overseas manufacturing facility. It recently opened its first overseas plant, a 1.2 GW solar module factory in Cambodia.

Chinese PV cell and module manufacturer SolarSpace has started cell production at its latest manufacturing facility, a 5GW factory in the Saysettha Development Zone in Laos, near the Thai border.

a supplier of solar energy equipment that meets international standards, such as solar panels, mounting structure, solar cables and inverters, and provides design and construction-installation services for all Solar Rooftops and Solar Farms in ...

capacity of the solar PV system to be connected to the grid will be significant. Due to its unstable electricity supply, the national grid's operation stability will be interfered with. Thus, a solar PV ...

We're experienced in on and off-grid electrification, from grid-tied solar rooftops to solar farms and solar-lanterns to decentralised mini-grids, including water pumps, vaccine fridges and many ...

The company's production base in Laos plans to build 9GW of battery plates and 3GW of high-efficiency solar cell panel assembly equipment, on a construction site of about 32 hectares, which is ...

SolarSpace, a China-based PV cell and module manufacturer, announced the first phase of a 5GW high-efficiency solar cell plant in Laos, giving momentum to its overseas production capacity ...

Technical: 100MW ground mounted (tracker) solar panels, central inverters, transformer and switchgear, monitoring, weather station, fence and other balance of system equipment. Year: 2023-2025. Scope of Work/Role. Project Co ...
