

What is Iraq's Energy Plan?

The plan includes several key pillars that support the government's goals to enhance Iraq's power infrastructure, as well as promote decarbonization and energy sector diversification.

What is the energy transition plan for Iraq?

This is the guiding strategy for our 'Energy Transition Plan' for Iraq and is the most comprehensive approach, covering all potential solutions the country can leverage." The plan proposes a strategic mix of customized technology and solutions that supports decarbonization across the energy landscape unique to Iraq.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Does Iraq have a green energy plan?

Iraq intends to generate 25% of its energy from green sources by 2030, and in 2022 made \$750m in low interest loans available to fund solar initiatives. An increase in renewable power will drive growth in green hydrogen and ammonia production.

Can Iraq achieve energy self-sufficiency without regional aid?

However, the path to energy sufficiency remains a considerable challenge for Iraq even with regional aid. Without domestic reforms to address the underlying causes of the energy crisis, Iraq's journey towards achieving energy self-sufficiency is still a considerable distance away.

What is the future of electricity supply in Iraq?

There are a number of pathways available for the future of electricity supply in Iraq but the most affordable, reliable and sustainable path requires cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix.
