

What is the Lesotho electricity project?

The project aims to increase access to electricity within Lesotho. This will be achieved by grid extension to industrial areas and households in peri-urban areas. The project will also promote private sector participation in the provision of electricity to underserved rural communities through deployment of mini-grids. Objectives

What's new at Pure Energy Centre?

The Pure Energy Centre is the first in Scotland to install a green high pressure O2 and H2 station. It also holds the distinction of installing the first community wind to hydrogen system in the world. The Pure Energy Centre is redefining the market with its adaptive and flexible clean energy technologies that can be used in conjunction with conventional, renewable and smart energy grids.

How can Lesotho improve electricity access?

Increase electricity access to households, schools and enterprises in Lesotho. -Provide reliable and affordable electricity through renewable energy sources to Basotho. -Provide training on entrepreneurship and productive uses of electricity for vulnerable women and underserved rural communities.

What is the NUL Energy Research Centre?

The NUL Energy Research Centre responds to the energy and climate change challenges facing Lesotho by developing and/or adapting knowledge and technologies that enable smooth transition to a sustainable energy system. LI-REED MSc. Research Award

In a bid to deliver high-quality education in sustainable energy, the National University of Lesotho's (NUL) Energy Research Centre (ERC) in collaboration with the European Union (EU) has launched a green energy ...

The huge M10.3 Million funding will see two villages in Lesotho being powered 100% by solar energy using two mini grids. How did they win? Dr Mpholo assembled an experienced team of ...

Lesotho: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

The Pure Energy Centre (PEC) is a manufacturer of small, medium and large scale renewable energy systems. PEC's focal point is on the development and deployment of projects centered on electrolyzers, storage, compressors, and ...

The NUL Energy Research Centre responds to the energy and climate change challenges facing Lesotho by developing and/or adapting knowledge and technologies that enable smooth ...
