

LG Energy Solutions is set to launch a new residential energy storage system in the U.S. this November. The product, called the enblock S, is a stackable, modular lithium-ion battery that the company said is designed around flexibility of design and ease of installation.

The all-in-one LG Home 8 Energy Storage Systems (ESS) is engineered to store and provide your home up to 14.4 kWh of usable energy from solar panels or AC-coupled power. And with energy efficient solutions, you can rest easy knowing your home is future-proofed with reliable backup power for ultimate peace of mind.

Innovative residential energy storage solution; Scalable design, versatile stacking, and a 10-year limited warranty; Prioritizes advanced battery tech, safety, and straightforward installation; All-in-one system: LG Home 8 battery, Smart Energy Box, ThinQ Smart Monitoring, and EnerVu

The LG Home 8 Energy Storage System is designed to phase out emergency backup fossil fuel generators, providing a cleaner alternative with solar-fed energy. It also offers automatic backup power options to protect against weather-based outage events.

Backed by a ten-year limited warranty (parts and labor), the LG ESS Home 8 system can store and provide 14.4 kWh of usable energy, allowing you to use that energy day or night to power your home, in the case of a power outage, and beyond.

Keep yours running smoothly with the LG Home 8 Energy Storage System (ESS)--a home battery backup solution built to store and provide up to 14.4 kWh of usable energy from solar panels or AC-coupled power.

The LG ESS Home 8 is LG Electronics' newest solution for energy storage and energy management. This energy storage system can be installed without the need of a solar energy system, but pairing the unit with solar allows for homeowners to save clean energy produced by solar.
