

How many MW does easy solar have in Liberia?

Since establishing operations in Liberia in 2018, Easy Solar has installed 0.63 MW in solar capacity and established over 7,000 energy service subscriptions, providing approximately 50,000 people with energy access in Liberia.

How many people in Liberia have access to electricity?

Fewer than 1% of rural Liberians have access to electricity. LIB Solar focuses on providing reliable, safe electricity to these communities by mobilizing communities instead of selling to individual customers. Each community receives high-quality solar systems that provide lighting and phone charging.

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

How will a financed project help Liberia?

The financed project will help to improve the affordability of off-grid energy products in Liberia and in the long term support higher standards of education, increase gender equality and create new employment opportunities in the country through productive use of electricity.

Where can I find more information about easy solar?

For more information, please visit Photo: Saleswoman in Liberia using a solar driven Easy Solar lamp for her product stall - Easy Solar Easy Solar, fourth project contracted in Liberia by the BGFA to support the scale-up of high-quality solar home systems and appliances in the country.

UK solar is in fact full companies that thought that doing "solar" merely involved doing a bunch of remote screening opinions and then doing an electronic submission, and sitting back waiting for planning success and a healthy payday when the consented site was sold. Indeed, during 2013 and 2014, hundreds of megawatts of applications were ...
