

Who is unigrid battery?

SAN DIEGO, Dec. 19, 2023 /PRNewswire/-- UNIGRID Battery, a University of California, San Diego spin-off startup company, announces that it has received its first commercial MWh-scale purchase orders for their advanced sodium ion batteries.

What is unigrid's sodium-ion battery technology?

Discover UNIGRID's sodium-ion battery technology that combines safety, performance, and sustainability. Our innovative batteries use abundant resources to deliver efficient and powerful energy storage solutions for a cleaner, safer world. Learn more and take the Sodium-Ion Challenge today!

Are unigrid batteries safe?

UNIGRID's sodium-ion batteries are unlike any other. Built in safety. For peace of mind. Third-party tested for safety, you will not find a safer sodium-ion battery with comparable performance. Our sodium-ion batteries do not undergo thermal runaway.

Will unigrid deliver MWh batteries in 2024?

UNIGRID's advanced sodium-ion batteries have undergone third-party testing and validation, and the company is on track to deliver MWh quantities to customers in 2024. The team is ramping up production in San Diego, California, to meet the growing interest and demand.

Are unigrid sodium-ion batteries safe?

Take the Sodium-Ion Challenge. For a cleaner, safer world. The world needs clean, safe, easily accessible, and affordable energy storage. We've cracked the code on a solution: UNIGRID's sodium-ion batteries, which use abundant resources, are lower-cost, safer, and just as powerful as any other battery. Why UNIGRID's sodium-ion batteries?

Will unigrid deliver advanced sodium ion batteries in 2024?

Erik A. Wu, CTO of UNIGRID. Third party testing and validation on the advanced sodium ion batteries has been completed, and UNIGRID is on track to deliver MWh quantities of its advanced sodium ion batteries to customers in 2024.

Engineers created a new type of battery that weaves two promising battery sub-fields into a single battery. The battery uses both a solid state electrolyte and an all-silicon anode, making it a silicon all-solid-state battery. The initial rounds of ...

UNIGRID Battery, a UC San Diego spin-off startup company and member of Cleantech San Diego's Southern California Energy Innovation Network (SCEIN), announces that it has received its first commercial MWh-scale purchase orders ...

UNIGRID Battery, a San Diego-based company developing advanced sodium-ion batteries, announced a successful closing of an oversubscribed \$12 million Series A funding round. The funding was Co-led by Transition VC and Ritz Venture Capital and joined by new investor Union Square Ventures and existing investor Foothill Ventures. The investment will ...

UNIGRID Battery, a University of California, San Diego spin-off company, was founded in 2021 from the groundbreaking Ph.D. research work by Dr. Darren H. S. Tan and Dr. Erik A. Wu, who were both ...

San Diego Business Journal -- UNIGRID Battery Raises \$12M Series A . View All . Find More Contacts for UNIGRID. Protected Content. Scientist. Non-Management 1 email found . View contacts for UNIGRID to access new leads and connect with decision-makers. View All Contacts . Details. Edit Details Section. Industries .

The battery uses both a solid state electrolyte and an all-silicon anode, making it a silicon all-solid-state battery. ... completed his chemical engineering PhD at the UC San Diego Jacobs School of Engineering and co-founded a startup UNIGRID Battery that has licensed this technology. Next-generation, solid-state batteries with high energy ...

UNIGRID works with battery manufacturing partners to immediately scale its products, avoiding the need for highly-customized equipment which has been a barrier for various next-generation battery technologies. This has resonated well with customers and system integrators looking for immediate alternatives to Li-ion batteries. We are impressed ...

Test the power of UNIGRID for yourself. Take the Sodium-Ion Challenge. Try it Today. Address. 6181 Cornerstone Ct. E Suite 103 San Diego, CA 92121. Company. Technology News Team Careers. Contact. info@unigridbattery . Follow us: LinkedIn;

Cleantech San Diego member and Southern California Energy Innovation Network company UNIGRID Battery, a San Diego-based startup developing advanced sodium-ion batteries, has announced a successful close of an oversubscribed \$12 Million Series A funding round. The financing was Co-led by Transition VC and Ritz Venture Capital and joined by new investor ...

UNIGRID, a provider of sodium-based battery solutions, raised \$12 million in an oversubscribed Series A funding round. The round was Co-led by Transition VC and Ritz Venture Capital and joined by new investor Union Square Ventures. Existing investor Foothill Ventures also participated in this round.

UNIGRID focuses on the development of sodium-ion batteries within the clean energy sector. Use the CB Insights Platform to explore UNIGRID's full profile. ... Unigrid Battery Receives Investment From LG Technology Ventures. Oct 24, 2024. LG Technology Ventures invests in UNIGRID to accelerate sodium-ion battery innovation. Oct 24, 2024.

The technology uses only abundant materials and is compatible with conventional Li-ion battery manufacturing infrastructure, the company notes. UNIGRID said it intends to use the proceeds to accelerate and scale up its battery production to fulfill MWh-scale customer orders. (USD 1.0 = EUR 0.937) Choose your newsletter by Renewables Now.
